Inspection Committee Report

The Wellness Lab
295A Broadway,
Orangeville, ON
L9W 1L2

Following a review of the Inspector's Report and all other documentation pertaining to the Part II New Premises inspection of the above premises conducted on June 13, 2022 the Inspection Committee has issued an outcome of a pass.

Recommendations

When Inspection Program Requirements are partially met and do not warrant a condition being placed on the premises, the Inspection Committee makes recommendations to the premises.

The Committee makes the following recommendations:

- i) As per Inspection Program Requirements regarding the labelling of the IV bag, specifically:
4.2.7: The directions for storage of the IV bag, and
4.2.9: Any cautionary information about the drug or substance.

The Committee recommends that the premises ensures that it complies with all labeling requirements as stated in the Inspection Program Requirements and the *Standard of Practice for Compounding* by ensuring that the following is always included:

- the directions for storage of the IV bag, and
- any cautionary information about the drug or substance.

- ii) As per Inspection Program Requirements 8.4.1: Documentation of a discussion regarding consent indicating the patient understands the nature of the intervention, its expected benefits, the material risks and side effects, available reasonable alternatives, the likely consequences of not receiving the intervention, the associated costs, and the right to withdraw consent, and 8.4.2: Documentation in the form of a notation in the patient record or a consent form that is dated, signed, and witnessed.

The Committee recommends that all information be provided to the patient when obtaining informed consent and that documentation in a form of notation is made in the patient record or on a consent form that includes the date, signature, and the witness.

iii) As per Inspection Program Requirement regarding Patient Chart Requirements 8.6.4: Patient's history regarding exposure to and infection from methicillin resistance organisms (MROs).

The Committee recommends that the patient's history regarding methicillin resistant organisms (MROs) is documented in their patient file.
